

UTSCH

Efficient hot stamping machine with innovative energy-saving option

Hot stamping machine **ERUT R 120 E-NL**

Hot stamping machine ERUT R 120 E-NL in summary

Power consumption
2 kW

Temperature range
0° C - 210° C

Stamping width
max. 120 mm

Stamping speed
2,7 m/min

Machine dimensions
675 x 500 x 550 mm

Weight
40 kg

The **ERUT R 120 E-NL** is a compact and efficient hot stamping machine that uses modern innovations to further improve the proven UTSCH hot stamping technology.

- ✓ **Overheating protection:** Secure rotation monitoring for temperature control, fire protection through overheating prevention
- ✓ **Rewinder and unwinder:** Motorised stamping wheel drive, mechanical brake on the unwinder
- ✓ **Display and control:** Modern display, electronic temperature control, precise temperature monitoring
- ✓ **Safety:** Speed monitoring of hot stamping wheel, mains plug interlock
- ✓ **Embossing process:** Height adjustment with 90° grid, silicone rubber carrier wheel (max. core diameter 100 mm, max. width 125 mm)

Maximum energy efficiency and cost savings

The insulated heating box ensures faster heating lower energy consumption. In addition, the ECO button enables a noticeable reduction in energy consumption in daily use.

In phases of low utilisation, the operating temperature can be reduced to 80° to 150° C, which reduces power consumption and operating costs. In stand-by mode, the machine protects the hot stamping wheel and extends its service life.

The worktable shown here (base frame, item number IT0000174) is not included in the delivery and is available as an optional extra. The supporting tables (Pertinax plates) shown and mounted on the machine are not part of the delivery and are available as an additional option. A second foil unwinder can also be ordered as an additional option.
