

# Security Plate Shredder HS

**Fast and secure destruction of expired license plates.**

The Security Plate Shredder HS cuts license plates of all sizes up to a thickness of 1 mm into small parts. This not only guarantees that expired license plates cannot be misused, but also produces metal scrap that is very compact, without sharp edges, to be easily handled.

Due to its high speed and robustness the HS version of the plate shredder is the ideal machine for high volume plate shredding. The transportation belt ensures a high level of work safety.

Made in Germany, it offers superior quality and long lifetime.

|                          |                                                     |
|--------------------------|-----------------------------------------------------|
| Connection load**:       | 400 V, 50 Hz, 3 phases                              |
| Power consumption:       | 3 kW                                                |
| Dimensions:              | length:1,440 mm, width: 1,240 mm, height: 1,700 mm  |
| Weight:                  | approximately 398 kg                                |
| Cross cut particle size: | 6 x 50 mm                                           |
| Features:                | thermal motor protection<br>open door safety switch |

\*Subject to alterations serving technical improvements. \*\*Further voltage range on request.

### Easy-switch

Intelligent control thanks to the innovative EASY-SWITCH that indicates operational status with back-lit controls.

### Automatic oil injection

Automatic oil injection during shredding ensures a consistently high shred performance.

### Conveyor belt

The conveyor belt system guarantees a high shred speed without material jams.

### The result

Compact license plate shreds.
